GANZA BELISE ALOYSIE ISINGIZWE

Hanover, NH | (603) 322 1575 | ganza.belise.aloysie.isingizwe@dartmouth.edu | **linkedIn** | **Portfolio**

EDUCATION

Dartmouth College, *Hanover, NH* — *June 2026*

Bachelor of Arts (B.A.), Mathematical Data Science, Computer Science — GPA 3.6/4.0

***Relevant Coursework**:* Data Structures and Algorithms (Java), Machine Learning and Statistical Analysis (Python), Programming and Computation (Python), Linear Algebra, Database Systems (SQL), Linear Models, Probability and Statistical Inference, Business Management and Strategy

***Student Groups*:** National Society of Black Engineers (NSBE), Dartmouth African Students Association, ColorStack Dartmouth

WORK EXPERIENCE

Global Health Fellow, Dartmouth Dickey Center – *Hanover, NH* — *October 2026 — Present*

- Selected as the Center's sole Global Health Fellow to support senior leadership across health, development, and security programs
- Research how UN peacekeeping missions can become a catalyst for renewable energy in fragile states, meeting the UN's sustainability goals while delivering lasting power to communities that need it most

Research Assistant, Persist Lab – *Hanover, NH* — *January 2026 — June 2026*

- Cleaned 146,000 patient-doctor messages and partnered with clinicians to annotate what defines a strong clinical response
- Fine-tuned 5 AI models in Python to draft patient replies, evaluating clinical accuracy against physician responses
- Co-authored a paper accepted to ACL titled "How Much Would a Clinician Edit This Draft?" on optimizing AI-drafted patient responses

Data Analyst Intern, *AKU Brain and Mind Institute – Nairobi, Kenya* — *June 2024 — August 2024*

- Architected and populated a SQL database to centralize high-volume biometric data from Fitbit APIs, designing a schema that reduced data redundancy and ensured integrity for a project focused on mitigating frailty and dementia risks in Kenyan adults aged 35 and older
- Built 3 interactive dashboards in Python (Pandas) and Power BI to track Fitbit data syncing and weekly survey responses
- Analyzed dashboard data and recommended engagement strategies that increased weekly survey responses by 20%

Consulting Extern, *PwC and Paragon One – Remote* — *May 2024 — July 2024*

- Analyzed the competitive landscape of a client farm by conducting an in-depth SWOT analysis of local organic farms in the same area
- Identified strategies for revenue growth and cost-saving initiatives, including a volunteer incentive program to reduce labor expenses
- Delivered an actionable roadmap with strategic recommendations, including phased implementation timelines, designed to drive a 10% increase in profitability while simultaneously capturing a larger market share

Software Development Research Assistant, *Jacobson Laboratory – Remote* — *September 2023 — April 2024*

- Engineered a conversational AI chatbot using Python and PyTorch, implementing NLP pipelines to process user sentiment and generate context-aware therapeutic responses
- Established product feedback loops by tracking model "hallucination" rates, utilizing data to prioritize backlog items for fine-tuning
- Designed internal benchmarking tools to measure inference quality, validating product performance and accelerating iteration cycles

LEADERSHIP & INVOLVEMENT

Events Coordinator, *ColorStack Dartmouth – Hanover, NH* — *September 2025 — May 2026*

- Directed community-building events and initiatives for 100+ students, overseeing all operational logistics and budget management

Operations Coordinator, *Dartmouth African Students Association – Hanover, NH* — *June 2024 — May 2025*

- Led the planning and execution of events and community initiatives for a group of over 200 students

Venture Capital Track Participant, *Black Venture Capital Consortium (BVCC) – Hanover, NH* — *August 2024 — December 2024*

- Built proficiency in market trend analysis, startup evaluation, and deal sourcing within venture capital

PROJECTS

Nestflow Housing Platform — *January 2026 — March 2026*

- Built a full-stack housing platform (React frontend, SQL backend) aggregating 4 listing APIs, including Zillow and Airbnb, with a conversational AI agent for real-time neighborhood and listing insights
- Engineered a roommate-matching algorithm pairing users by budget and lifestyle, achieving 95% user satisfaction in testing

Halo Team Networking Glasses — *March 2025 — June 2025*

- Surveyed 40+ users on pain points in in-person networking, then designed an MVP and refined it through rounds of usability testing
- Built a working AR glasses prototype and companion web interface that displays real-time information about people during conversations

fMRI Music Genre Classifier: data classification using Logistic Regression and Linear SVC — *January 2024 — March 2024*

- Conceptualized and built a classification pipeline to predict distinct music genres from fMRI brain images using Python and scikit-learn
- Trained and tested the models on another dataset and achieved an accuracy of 97%

SKILLS & INTERESTS

- ***Programming*:** Java, Python, JavaScript, CSS, HTML5, SQL, R, React
- ***Experience with*:** Excel, Machine Learning, Scikit-learn, NoSQL, MongoDB, AWS, Linux, Git, GitHub, Figma, Power BI, Tableau, Redis, Kubernetes, Jenkins, PyTorch, VS Code
- ***Interests*:** Global Health, Sustainable Development, Music
