GANZA BELISE ALOYSIE ISINGIZWE

Hanover, NH | (603) 322 1575| beliganza@gmail.com| **linkedIn** | **Portfolio**

EDUCATION

Dartmouth College*, Hanover, NH* *June 2026*

Bachelor of Arts (B.A.), Mathematical Data Science, Computer Science GPA 3.6/4.0

Relevant Coursework*:* Data Structures and Algorithms (Java), Machine Learning and Statistical Analysis (Python), Programming and Computation (Python), Linear Algebra, Database Systems (SQL), Linear Models, Probability and Statistical Inference, Business Management and Strategy

Student Groups**:** National Society of Black Engineers (NSBE), Dartmouth African Students Association, ColorStack Dartmouth

WORK EXPERIENCE

Research Assistant, Persist Lab– *Hanover, NH* *January 2026 — June 2026*

- Cleaned and organized a dataset of 146,000 patient messages and doctor responses; worked with experienced clinicians to review and annotate the data to ensure accuracy and identify the key elements that make a good clinical response
- Fine-tuned 5 different AI models using Python to draft responses to patient messages; evaluated how well each model performed by comparing their responses to real doctor answers, checking whether the AI captured the same clinical meaning
- Co-authored a research paper accepted to the ACL conference ("How Much Would a Clinician Edit This Draft?"), demonstrating how specific AI adaptation strategies optimize clinically appropriate patient responses

Data Analyst Intern, *AKU Brain and Mind Institute – Nairobi, Kenya* *June 2024 — August 2024*

- Architected and populated a SQL database to centralize high-volume biometric data from Fitbit APIs, designing a schema that reduced data redundancy and ensured integrity for a project focused on mitigating frailty and dementia risks in Kenyan adults aged 35 and older
- Developed automated visualization pipelines using Python (Pandas) and PowerBI to synchronize and track health metrics
- Implemented data-driven optimizations to resolve engagement bottlenecks, increasing weekly survey responses by 20%

Consulting Extern, *PWC and Paragon One – Remote* *May 2024 — July 2024*

- Analyzed the competitive landscape of a client farm by conducting an in-depth SWOT analysis of local organic farms in the same area
- Identified strategies for revenue growth and cost-saving initiatives, including a volunteer incentive program to reduce labor expenses
- Delivered an actionable roadmap with strategic recommendations, including phased implementation timelines, designed to drive a 10% increase in profitability while simultaneously capturing a larger market share

Software Development Research Assistant, *Jacobson Laboratory – Hanover, NH* *September 2023 — April 2024*

- Engineered a conversational AI chatbot using Python and PyTorch, implementing NLP pipelines to process user sentiment and generate context-aware therapeutic responses
- Established product feedback loops by tracking model "hallucination" rates, utilizing data to prioritize backlog items for fine-tuning
- Designed internal benchmarking tools to measure inference quality, validating product performance and accelerating iteration cycles

LEADERSHIP & INVOLVEMENT

Mentor, *Project Access – Remote* *September 2025 — Present*

- Review and edit core college application essays to ensure compelling storytelling and alignment with university expectations
- Guide 4 high school students through college applications, from school selection, application process to interview preparation

Events Coordinator, *ColorStack Dartmouth– Hanover, NH* *September 2025 — May 2026*

- Directed community-building events and initiatives for 100+ students, overseeing all operational logistics and budget management

Operations Coordinator, *Dartmouth African Students Association – Hanover, NH* *June 2024 — May 2025*

- Led the planning and execution of events and community initiatives for a group of over 200 students

Venture Capital Track Participant, *Black Venture Capital Consortium (BVCC) – Hanover, NH* *August 2024 — December 2024*

- Built proficiency in market trend analysis, startup evaluation, and deal sourcing within venture capital

PROJECTS

Halo Team Networking Glasses *March 2025 — June 2025*

- Conducted user research and surveys to identify networking pain points, designing an MVP and executing iterative usability testing to optimize social interaction mechanics
- Developed a functional web prototype translating high-fidelity wireframes into a responsive interface to simulate real-time AR overlays

fMRI Music Genre Classifier: data classification using Logistic Regression and Linear SVC *January 2024 — March 2024*

- Conceptualized and built a classification pipeline to predict distinct music genres from fMRI brain images using Python and scikit-learn
- Trained and tested the models on another dataset and achieved an accuracy of 97%

SKILLS & INTERESTS

- ***Programming*****:** Java, Python, JavaScript, CSS, HTML5, SQL, R, React
- ***Product Management****:* Agile Methodologies, Data Analysis, Market Research, Roadmap Development, Wireframing, Google Workspace
- ***Experience with*****:** Excel, Machine Learning, Scikit-learn, React, NoSQL, MongoDB, AWS, Linux, Git, GitHub, Figma, Power Bi, Tableau, Redis, Kubernetes, Jenkins, PyTorch
- ***Interests*****:** Global Health, Sustainable Development, Music
